

Official Correction Notice

SYROCS would like to issue an official clarification regarding a labeling inconsistency identified in one of our products.

It has come to our attention that a limited batch of Syrodox 400 – Testosterone Blend was released with an incorrect product name printed on the ampoules. Specifically, the ampoules were mistakenly labeled as “Trenbolone Blend” instead of “Testosterone Blend.”

We would like to emphasize the following:

- The formulation and composition of the product are correct and remain unchanged:
- Testosterone Cypionate USP – 100 mg
- Testosterone Isocaproate BP – 100 mg
- Testosterone Phenylpropionate BP – 100 mg
- Testosterone Decanoate BP – 100 mg
- The labeling discrepancy is strictly limited to the ampoule print.
- All other packaging components, including the outer box and enclosed leaflet, display the correct product name and information.
- This issue does not affect the quality, safety, or efficacy of the product in any way.

This notice applies exclusively to the following batch:

Batch Number: STB2401

Expiration Date: 06/2028

In the interest of full transparency, a Certificate of Analysis (COA) for the affected batch is provided and confirms the product’s correct composition and compliance with quality standards.

We sincerely apologize for any confusion or inconvenience this may have caused. Syrocs remains fully committed to maintaining the highest standards of quality, accuracy, and trust.

If you have any questions or require further clarification, please do not hesitate to contact us.
